

Dear Mister/Missess Hiring Manager,

I am so excited to apply for the position at your company. I am a student at the University of Arkansas at Little Rock. My major is Web Design and Development with a minor in both Information Technologies and Graphic Design.

As a web design and development major, I have developed a needs-analysis with the customers, able to analyze customer needs, developed various proposals and prototypes, and implemented the solution into HTML, CSS, and occasionally WordPress and Figma.

I have implemented two different web projects in my experience:

- Buffalo River Adventures
- Arkansas Space Grant Consortium

In addition, I have the following soft skills:

- Working in teams
- Software project management
- Working directly with customers
- Effective time management

Not only do I have experience with web design, but I also have experience in graphic design. I have taken many courses in the world of graphic design.

Here are some examples of my graphic design work:

- Animal Logo
- Poster for Change
- Magazine Cover

I anticipate completing my BA in Web Design and Development in 2027. I believe that I have the broad range of experience, skills, web design knowledge, personal commitment, and professional track record to manage projects and develop software to help you meet your goals.

Thank you for your time,

Madison Young
